PROJECTS

CafeLovin 2025

Tech Stacks: HTML, CSS, JavaScript, PHP

Small coffee shops lacked a digital platform for customers to browse menus and place orders online, leading to long queues and poor customer experience. Designed and developed an online coffee ordering website enabling customers to browse items, place orders, and complete simulated transactions. Built using HTML, CSS, and JavaScript for the frontend with PHP handling backend logic, supporting dynamic cart updates and real-time price calculations. Achieved a fully responsive and seamless ordering interface through optimized frontend design and JavaScript-based form validation.

Library Management System 2025

Tech Stacks: HTML, CSS, JavaScript, PHP, SQL

Libraries struggled with manual book tracking and borrowing processes, causing errors in records and delays in issuing books to students. Developed a full-featured library management system to automate book inventory tracking and simplify the borrowing and return process. Built with HTML, CSS, and JavaScript for the frontend and PHP with SQL for backend operations, incorporating secure authentication and book management modules. Delivered a responsive user experience through dynamic content rendering and optimized frontend design, enabling efficient library administration.
